## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Bodin et al. (USPN 6091430), hereinafter simply Bodin.

2. In regard to claim 1, Bodin teaches a method for preventing an unauthorized display source from overwriting an image displayed by an authorized display source on a video display system, comprising: under control of code that is independent of a native operating system, (col.2 lines 40-45 shows DOS application), generating a display region mask that defines a display area of the video display system; (col.2 lines 28-32 shows displaying of multi virtual DOS application); associating the generated display region mask with the authorized display source; and upon receiving an indication from the authorized display source to write the image within the area defined by the associated display region mask, (col.2 lines 45-50 shows foreground task), transparently writing the image onto the display area, (col.2 lines 48 –50 shows at least a portion of logical video buffer may be written to a displayed window), such that output from an unauthorized source is not displayed within the area defined by the associated display
